

The organizers of the

## Conference of environmental archaeology 2024

University of Hradec Králové  
and  
Museum of Eastern Bohemia

Would like to invite you to the 18th meeting of CEA with topic

### Environment and culture

Which will be held on 7 to 9 February 2024 in auditorium of the Museum of Eastern Bohemia,  
Eliščino nábřeží 465/7, Hradec Králové

The conference will focus on environment and culture. These two phenomena represent two inseparable dimensions that shape the human world. In doing so, the two components influence each other and to some extent condition each other. Therefore, environmental research in the field of archaeology should not be unilaterally focused only on the environmental dimension in its analysis and interpretation, but should also reflect the cultural context of the environmental phenomena studied. The conference organizers hope that papers will focus on different aspects according to the focus of individual researchers, but should always consider both components of the topic. Topics related to questions such as: what is the relationship between the natural environment and social institutions? How does one component respond to changes in the other? What are the differences in the real and symbolic treatment of plants or animals? And the phenomena of inanimate nature? How do different components of nature shape economic or cultural phenomena? Do commonly studied phenomena in one field have unsuspected or hidden connections in the other field? In addition to archaeologists and naturalists, we are also happy to welcome historians, ethnologists and other interested parties.
